\* Preliminary.

1/ Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SF and NIB, the SF bonds, and NIB borrowings from SF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SF deposits and Budget Sector borrowing from Economic Authorities).

7/ Total Government Debt includes External Debt serviced by the Ministry of Finance.

8/ During the second quarter of FY12/13, a total amount of US\$ 4 billion were deposited in CBE as part of a Qatari financial assistance pledge.

9/ GDP estimate for FY16/17 has been revised recently to reach LE 3470 billion instead of 3478 billion. Meanwhile GDP projections for FY17/18 are estimated to reach LE 4286.5 billion as per the Ministry of Finance Calculations.

10/ There is a combined factor behind the hike witnessed in gross external debt as percent of GDP at end of September 2017: the drop in GDP denominated in US\$ after the floatation that took place in November 2016, and the increase in gross external debt by US\$ 20.7 bn during the period from September 2016 to September 2017; nevertheless it decelerated compared to June 2017.
