Revised

1/ It is noteworthy to mention that Ministry of Planning is revising GDP data for FY17/18 on quarterly basis.

2/ Real percent change is calculated using constant prices for FY06/07, however, starting FY12/13 growth rates are calculated using constant prices for FY11/12, and starting FY17/18 growth rates are calculated using constant prices for FY16/17.

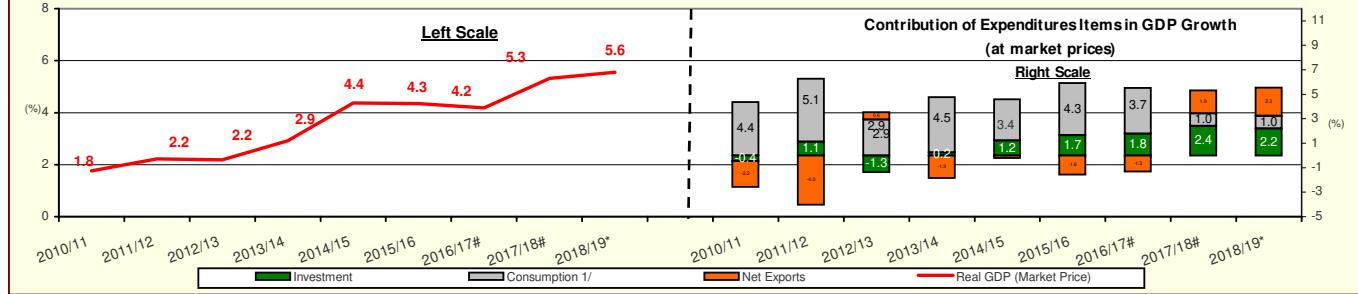

3/ Includes petroleum and natural gas activities.

4/ Includes Net Indirect Taxes.

5/ Gross Capital Formation. Includes change in inventory.

6/ Current prices.

-- Data are preliminary & under preparation until being finalized.

* The decrease in tax revenues is a result of a combined factor among which the deceleration in receipts from CBE in light of the restrictive monetary policy, in addition to the decline in some receipts associated with the appreciation in the Egyptian currency such as the receipts from customs and Suez Canal.

1/ The decrease in non-tax revenues, came on the back of the decline in the exceptional resources from grants during the year of comparison.

2/ Data reflects budget figures in light of Decree Number 79 for the year 2019.

3/ Based on IMF GFS 2001 (modified to cash basis).

4/ Includes Central Administration and Local Governments, and Public Services Authorities.

5/ Overall deficit net of interest payments.

6/ Overall deficit excluding net acquisition of financial assets.

7/ Includes consolidated operations for the budget sector, National Investment Bank (NIB), and Social Insurance Funds (SIF). Data are prepared on consolidated basis; excluding financial interrelations between the three bodies.

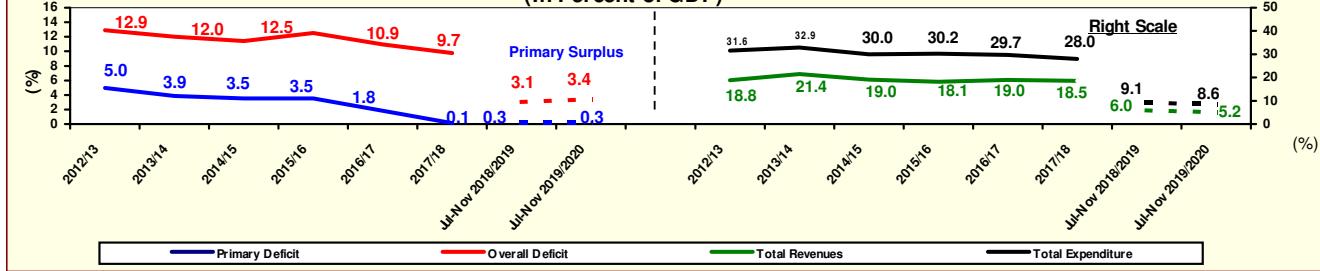

8/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 is projected to reach LE 6162.6 billion as per the Ministry of Finance Calculations

9/ The increase in interest could be explained in light of the increase in interest Payments due to social pensions' advance payment in September 2019 instead of later in June same fiscal year.

10/ The increase in Budget deficit during the period of study compared to same period last year could be explained in light of the increase in interest Payments due to social pensions' advance payment in September 2019 instead of later in June same fiscal year.

1/ Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SF and NIB, the SF bonds, and NIB borrowings from SF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SF deposits and Budget Sector borrowing from Economic Authorities).

7/ Total Government Debt includes External Debt serviced by the Ministry of Finance.

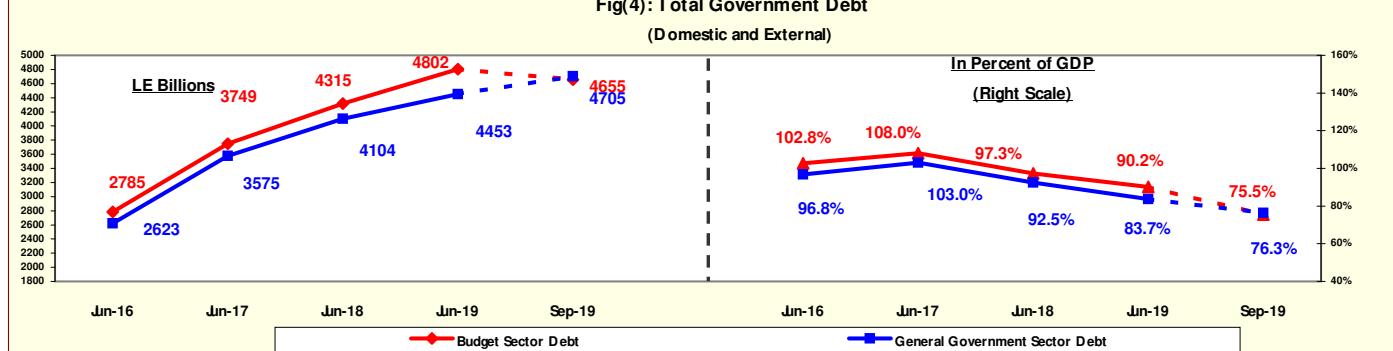

8/ During the second quarter of FY12/13, a total amount of US\$ 4 billion were deposited in CBE as part of a Qatari financial assistance pledge.

9/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 is projected to reach LE 6162.6 billion as per the Ministry of Finance Calculations

10/ There is a combined factor behind the decrease witnessed in gross external debt as percent of GDP at end of September 2019 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY 19/20; on the other hand, the increase of Gross External Debt at a slower pace due to the appreciation in exchange rate.
