# Revised.

1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ According to the Ministry of Planning, GDP (at market prices) for 2013/2014 is projected to reach LE 2033.8 billion compared to a revised figure of LE 1753 billion in 2012/2013.

<sup>1/</sup> Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB.<sup>2/</sup> This represents part of the Economic Authorities' deposits at TSA that is borrowed by the Budget sector in the form of loan facilities. Hence it represents an interrelated debt between the Budget and Economic Authorities and is therefore deducted on consolidation from both gross Public Sector debt and deposits of Economic Authorities.<sup>3/</sup> SIF deposits were previously included in General Government deposits, see Table (16).<sup>4/</sup> Data revised to exclude deposits used as loan facilities for budget sector starting June 2006.<sup>5/</sup> According to the Ministry of Planning, GDP (at market prices) for 2013/2014 is projected to reach LE 2033.8 billion compared to a revised figure of LE 1753 billion in 2012/2013.

# Revised.

1/ Based on CBE classification. CBE writes-off outstanding debt on government entities (both direct and indirect) to Paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts (dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

2/ CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

3/ The notable increase in non-government external debt during the first half of the fiscal year 2013/2014 can be explained in light of a net increase of nearly US\$ 4.4 billion in external debt on the monetary authorities compared to end of December 2012/2013. The breakdown of inflows is as follows: US\$ 2 billion from UAE, US\$ 2 billion from Saudi Arabia and US\$ 3 billion from Kuwait. Meanwhile the Qatari short term deposit worth US\$ 2 billion was cancelled and a Qatari deposit worth US\$ 1 billion was converted into T-bonds during the period of study. Moreover, it is important to highlight that Egypt has returned another matured deposits worth US\$ 1 billion to Qatar during the period of study.
