* Preliminary, subject to revision.

1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ The Ministry of Planning has revised the time series of GDP starting in FY11/12 until FY13/14 in accordance with the economic census, to reach LE 1657 billion and LE 1844 billion and LE 2102 billion respectively. It is worthy to highlight that quarterly data are still under preparation and will be published once officially announced by the Ministry of Planning. It is also worthy to note that GDP estimates for 2014/2015 have been revised to LE 2431.1 billion in light of these recent developments.

^{*} Preliminary, subject to revision.^{1/} Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB.^{2/} This represents part of the Economic Authorities' deposits at TSA that is borrowed by the Budget sector in the form of loan facilities. Hence it represents an interrelated debt between the Budget and Economic Authorities and is therefore deducted on consolidation from both gross Public Sector debt and deposits of Economic Authorities.^{3/} SIF deposits were previously included in General Government deposits, see Table (16).^{4/} Data revised to exclude deposits used as loan facilities for budget sector starting June 2006.^{5/} The Ministry of Planning has revised the time series of GDP starting in FY11/12 until FY13/14 in accordance with the economic census, to reach LE 1657 billion and LE 1844 billion and LE 2102 billion respectively. It is worthy to highlight that quarterly data are still under preparation and will be published once officially announced by the Ministry of Planning. It is also worthy to note that GDP estimates for 2014/2015 have been revised to LE 2431.1 billion in light of these recent developments.

^{1/} External debt has witnessed a US\$ 2 billion net increase by end of June 2015, compared to end of June 2014 in light of the following developments: a US\$ 6 billion increase in the form of GCC deposits, a US\$ 1 billion as suppliers' and buyers' credit from other countries, in addition to the issuance of a Euro-Bond worth US\$ 1.5 billion.

On the other hand, external debt decreased due to the repayment of Qatari bonds worth US\$ 2.7 billion, in addition to about US\$ 1.4 billion decrease due to repaying part of Paris Club debt, as well as about US\$ 0.8 billion as bilateral loan repayments, and about US\$ 1.1 billion as short-term debt repayments. In addition to a US\$ 0.6 billion decrease in light of repayment to international institutions and organizations.

^{2/} Based on CBE classification. CBE writes-off outstanding debt on government entities (both direct and indirect) to Paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts (dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

^{3/} CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

^{4/} The Ministry of Planning has revised the time series of GDP starting in FY11/12 until FY13/14 in accordance with the economic census, to reach LE 1657 billion and LE 1844 billion and LE 2102 billion respectively. It is worthy to highlight that quarterly data are still under preparation and will be published once officially announced by the Ministry of Planning. It is also worthy to note that GDP estimates for 2014/2015 have been revised to LE 2431.1 billion in light of these recent developments.
