1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ GDP estimate for FY16/17 has been revised recently to reach LE 3478 billions instead of 3407.7 billions. Meanwhile GDP projections for FY17/18 are estimated to reach LE 4286.5 billions as per the Ministry of Finance calculations.

1/ Gross External Government debt has witnessed an increase during last year by US\$ 23.3 billion mainly in light of the borrowing from Eurobond issuances of 7 billions, 2.75 billions loan by the IMF (part of extended fund facility), 2 billions loan by the World Bank and 0.5 billion loan by the African Development Bank.

2/ Based on CBE classification, CBE writes-off outstanding debt on government entities (both direct and indirect) to Paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts (dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

3/ CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

3/ During the second quarter of FY12/13, a total amount of US\$ 4 billion were deposited in CBE as part of a Qatari financial assistance pledge.

4/ GDP estimate for FY16/17 has been revised recently to reach LE 3478 billions instead of 3407.7 billions. Meanwhile GDP projections for FY17/18 are estimated to reach LE 4286.5 billions as per the Ministry of Finance calculations.

5/ Gross external debt as % of GDP is calculated using end of period exchange rate.

6/ There is a combined factor behind the hike witnessed in gross external debt as percent of GDP at end of June 2017: the drop in GDP denominated in US\$ after the floatation that took place in November 2016, and the increase in gross external debt by US\$ 23.3 bn during the period from June 2016 to June 2017.

7/ Worth mentioning that gross external debt at end of quarter is calculated as a ratio of full-year exports of goods and services.
