1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ GDP actuals for FY18 /19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

* Preliminary.

1/ Gross External Government debt has witnessed an increase during last year by US\$ 23.3 billion mainly in light of the borrowing from Eurobond issuances of 7 billions, 2.75 billions loan by the IMF (part of extended fund facility), 2 billions loan by the W orldBank and 0.5 billion loan by the African Developement Bank.

2/ It's noteworthy that during 2017 a total amount of US\$ 30 billion was repaid, as per Central Bank of Egypt, distributed on due bonds, foreign debt of international banks such as African Export-Import Bank, deposits and loans from many countries of which KSA, Libya and Turkey, in addition to obligations to government entities such as EGPC and other obligations to Paris Club.

3/ Based on CBE classification. CBE writes-off outstanding debt on government entities (both direct and indirect) to paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts(dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

4/ CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

5/ Gross External debt/GDP and Government external debt/GDP are as reported by central Bank of Egypt and non-government debt/GDP is residual.

6/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

7/ W orth mentioning that gross external debt at end of quarter is calculated as a ratio of full-year exports of goods and services.
