In light of the responsiveness of recent macro-economic indicators to the comprehensive reform program, GDP grew by 3.3 percent during FY20/21 compared to 2.3 percent during 2011-2014 on average. Although the growth rate was expected to reach 6 percent during FY2019/2020, the Egyptian Economy succeeds to achieve positive growth rate, while other countries recorded negative growth. On the sectoral side, growth has been driven by total social services sector (mainly real estate, general government, education and health), and the increase in telecommunications, transport, and financial Intermediation sectors, and the increase in agriculture, construction, and natural gas sectors. External Sector

- **The Balance of Payment recorded** an overall deficit of US\$ 7.3 billion during the period July-March 2021/2022. This comes as **current account deficit almost stabilized at US\$ 13.6 billion, while capital and financial account has recoded inflows of US\$ 10.8 billion** during the period of study, compared to US\$ 17 billion of inflows last year. This could be explained in light of the global imbalances **from the unprecedented inflationary waves currently sweeping the world as the sectors that had been deterred by the COVID-19 pandemic resumed their usual activity leading to widening global trade deficits, and Egypt was no exception. Furthermore, the ramifications of the Russia-Ukraine war affected large-scale portfolio outflows, as many countries tightened their monetary policies to contain inflation.**

Which was offset by,

- **Services surplus improved by US\$ 4.8 billion to record US\$ 7.9 billion during the period of study, mainly due to:**
 - **The increase in tourism receipts to record US\$ 8.2 billion** (compared to US\$ 3.1 billion during the same period of last year).
 - **The increase in transport receipts by 27.8 percent to record US\$ 7 billion during period of study** (compared to US\$ 5.5 billion during last year). **mainly driven by the increase in Suez Canal receipts by 16.9 percent to register US\$ 5.1 billion during the period of study.**
 - **The increase in remittances by 1.1 percent to record US\$ 33.6 billion.**
 - **Oil trade balance surplus rose to US\$ 4.1 million.** This came as a main result of the rise in the value of natural gas exports to record US\$ 5.6 billion, due to **opening new markets in Turkey and Europe, mainly in Italy, France, Spain, Croatia, and Greece.**

1/ Debt figures follow consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

4/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

5/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

6/ Total Government Debt includes External Debt serviced by the Ministry of Finance.

7/ Quarterly debt service data represent cumulative flows from beginning of fiscal year.

8/ GDP actuals for FY18 /19 has been revised to reach LE 5232.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

9/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

1/ Starting September 2019, CPI Urban data is based on the weights derived from 2017/2018 income and expenditure survey, and using 2018/2019 as a base. Prior to this date, the basket and weights were derived from 2007/2008 income and expenditure survey taking January 2010 as a base month.

2/ The new series of Producer Price Index was issued by CAPMAS starting September 2007, using 2004/2005 prices of goods and services as a base period, and deriving sub-group weights from average values of agricultural, industrial and services production for the years 2002/2003 and 2003/2004. It is worth mentioning that Producer Price Index series before September 2007 are not available so far.

3/The Central Bank of Egypt launched "Core Inflation Index" derived from the CAPMAS headline CPI, however it excludes items characterized by inherent price volatility and those with managed prices, specifically 'fruits and vegetables' (8.8 percent of headline CPI basket) as well as 'regulated items' (19.4 percent of headline CPI basket).

* Preliminary-Actual.

* Data reflects budget figures in light of Presidential Decree Number 8 for the year 2016.

-- Data are preliminary & under preparation until being finalized.

1/ Data reflects budget figures in light of Decree Number 85 for the year 2020.

2/ The decline in Taxes on Corporate Profits from CBE is mainly due to the accommodative monetary policy adopted by the CBE to curb inflation since FY16/17, where the increase in interest rates has imposed burdens on CBE profits, as it is expected that no tax receipts would be collected from CBE till end of FY19/20.

3/ The noticeable increase in Tax on T-bills and bonds' payable interest is mainly due to the adoption of new law number 3 for the year 2021, which included the removal of tax exemptions implied to T-bills and bonds' payable interest in March 2021.

4/ Data reflects budget figures in light of Decree Number 74 for the year 2021.

1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ GDP actuals for FY18 /19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

* Preliminary.

1/ Gross External Government debt has witnessed an increase during last year by US\$ 23.3 billion mainly in light of the borrowing from Eurobond issuances of 7 billions, 2.75 billions loan by the IMF (part of extended fund facility), 2 billions loan by the World Bank and 0.5 billion loan by the African Development Bank.

2/

It's noteworthy that during 2017 a total amount of US\$ 30 billion was repaid, as per Central Bank of Egypt, distributed on due bonds, foreign debt of international banks such as African Export-Import Bank, deposits and loans from many countries of which KSA, Libya and Turkey, in addition to obligations to government entities such as EGPC and other obligations to Paris Club.

3/

Based on CBE classification. CBE writes-off outstanding debt on government entities (both direct and indirect) to Paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts (dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

4/ CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

5/ GDP actuals for FY18 /19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE 5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

6/ Gross external debt as % of GDP is calculated using end of period exchange rate.

7/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

8/ Worth mentioning that gross external debt at end of quarter is calculated as a ratio of full-year exports of goods and services.

3/ Data reflects external loans that are serviced by MOF only until June 2007. Starting June 2008, data includes the blocked account, which incorporates debt repayments by government entities according to the original schedule (which precedes rescheduled dates in light of Paris Club Agreement).

4/

At end of June 2008, the CBE and Ministry of Finance agreed to use part of the blocked account balance to retire part of the bonds outstanding on government to CBE, and in return the Ministry of Finance is obligated to service Paris Club debt on due dates to creditors. Thus external debt serviced by the Ministry of Finance has significantly increased at end of June 2008. Meanwhile, CBE revised its classification of Government external debt only in Sep'08, which explains the increase in Debt Serviced by MOF over government debt reported by CBE on Jun'08.

* Preliminary

1/ The increase witnessed in the total government debt service comes in light of the rise in the principal payments of the domestic debt due to the increase in treasury bond repayments by almost LE 100 billion by the end of FY14/15.

2/ GDP actuals for FY18 /19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.
