- **The improvement in current account deficit was mainly due to:**
 - **Non-Oil trade deficit narrowed by US\$ 2 billion to record US\$ -9 billion during the period of study, compared to US\$ -11 billion during the same period of last year, mainly due to the increase in non-oil merchandise exports by 5.1 percent** to reach US\$ 6.3 billion during Q1 FY22/23 (mainly increased exports of phosphate, mineral fertilizers, gold, transmitter and receiver devices of radio/television, and ready-made clothes. **Meanwhile, non-oil merchandise imports declined by 9.9 percent** to reach US\$ 15.3 billion during the period of study, compared to US\$ 17 billion during the same period last year (mainly due to the decline in imports of passenger vehicles, telephones, pharmaceutical preparations, gauze pads and vaccines).
 - **Tourism receipts rose by 43.5 percent to record US\$ 4.1 billion** (compared to US\$ 2.8 billion during the same period of last year), in light of the rise in number of tourist nights by 47.1 percent to reach 43.6 million nights, and the rise in number of tourist arrivals to Egypt by 52.2 percent to reach 3.4 million tourists during the period of study.
 - **The increase in transport receipts by 33.7 percent to record US\$ 3 billion** during period of study (compared to US\$ 2.3 billion during same period of last year). mainly driven by the increase in Suez Canal receipts by 19.1 percent to register US\$ 2 billion

during the period of study (driven by the rise in net tonnages of vessels by 13.8 percent to reach 372.7 million tons).

- **The deficit of oil trade balance stabilized at US\$ 106 million.** This came as a main result of the surge in oil exports by US\$ 807.3 million during the period of study, on the back of increased natural gas exports. Such a rise was curbed by the decline in exports of crude oil, and the rise in imports of oil, and which led the oil trade deficit balance to stabilize during the period of study.

The Capital and Financial Accounts performance

- **The capital and financial recorded net inflows of US\$ 4.4 billion** during the period of study, mainly driven by:
 - **FDIs net inflows has doubled to reach US\$ 3.3 billion during Q1 FY22/23, compared to US\$ 1.7 billion net inflows last year,** as FDIs in non-oil sector increased to record net inflows of US\$ 3.6 billion, mainly due to capital increases of existing companies to reach US\$ 1 billion, and sale proceeds of companies and productive assets of non-residents recorded net inflows of US\$ 1 billion during the period of study. Meanwhile, FDI in the oil sector outflows declined to reach only US\$ 320.4 million during the period of study, compared to US\$ 489.2 million during the same period of last year.
 - **Portfolio investment in Egypt** recorded outflows of US\$ 2.2 billion during Q1 FY22/23, compared to US\$ 3.6 billion outflows during the same period last year, due to the repercussions from the war in Europe, and due to the global tight financial conditions.
 - **Change in the liabilities of the CBE posted a net inflow of US\$ 652.4 million during the period of study.**

1/ Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due to Central Administration, Local Governments, and Public Service Authorities.

3/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

4/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

5/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

6/ Total Government Debt includes External Debt serviced by the Ministry of Finance.

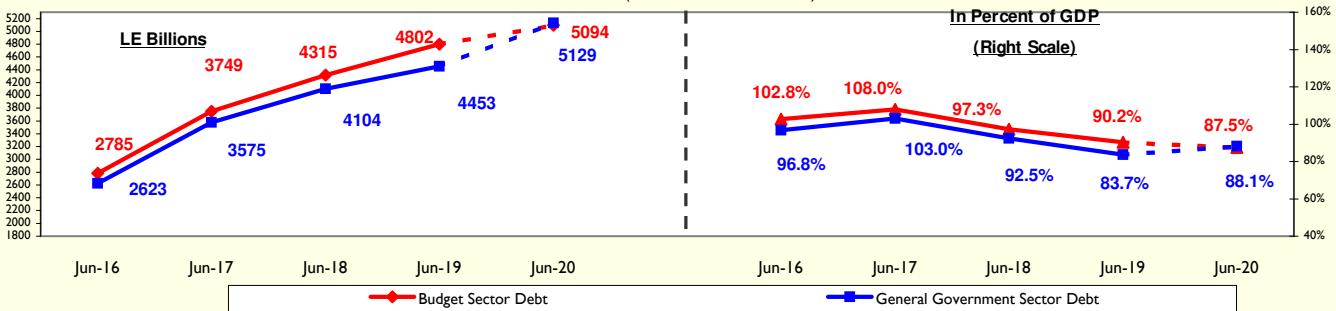

7/ Quarterly debt service data represent cumulative flows from beginning of fiscal year.

8/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

9/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

1/ Starting September 2019, CPI Urban data is based on the weights derived from 2017/2018 income and expenditure survey, and using 2018/2019 as a base. Prior to this date, the basket and weights were derived from 2007/2008 income and expenditure survey taking January 2010 as a base month.

2/ The new series of Producer Price Index was issued by CAPMAS starting September 2007, using 2004/2005 prices of goods and services as a base period, and deriving sub-group weights from average values of agricultural, industrial and services production for the years 2002/2003 and 2003/2004. It is worth mentioning that Producer Price Index series before September 2007 are not available so far.

3/The Central Bank of Egypt launched "Core Inflation Index" derived from the CAPMAS headline CPI, however it excludes items characterized by inherent price volatility and those with managed prices, specifically 'fruits and vegetables' (8.8 percent of headline CPI basket) as well as 'regulated items' (19.4 percent of headline CPI basket).

* Preliminary-Actual.

* Data reflects budget figures in light of Presidential Decree Number 8 for the year 2016.

-- Data are preliminary & under preparation until being finalized.

1/ Data reflects budget figures in light of Decree Number 85 for the year 2022.

2/ The decline in Taxes on Corporate Profits from CBE is mainly due to the accommodative monetary policy adopted by the CBE to curb inflation since FY16/17, where the increase in interest rates has imposed burdens on CBE profits, as it is expected that no tax receipts would be collected from CBE till end of FY19/20.

3/ The noticeable increase in Tax on T-bills and bonds' payable interest is mainly due to the adoption of new law number 3 for the year 2021, which included the removal of tax exemptions implied to T-bills and bonds' payable interest in March 2021.

-- Data are preliminary & under preparation until being finalized.

1/ Data reflects budget figures in light of Decree Number 85 for the year 2020.

2/ Reflects Treasury contributions towards Pension Funds.

3/ Includes expenditures on defense.

4/ The increase in "Direct investment (including customs fees)" represents expected increases in self finances for the social housing program. This increase has similarly corresponding increases on the revenues side.

5/ The decline in subsidies from EGPC is mainly in light of the decline in international petroleum prices.

6/ The increase in spending on Direct investment (including customs fees) is mainly due to the increase in infrastructure spending, more specifically spending on roads, transportation, buildings, hospitals and schools. To that extent, total spending on construction amounted to LE 29.2 billion during FY15/16, increasing by 44 percent compared to the previous year, and spending on Non-residential buildings amounted to LE 10 billion, increasing by 17.7 percent compared to the previous year.

7/ The increase in Service expenditures for non employees reflects the increase in spending on health treatments financed by state budget.

8/ The notable increase in subsidies to EGPC is mainly due to the Exchange rate depreciation effects which has increased EGPC cost burdens substituted through increasing the allocated subsidies to EGPC.

9/ It is noteworthy that "of which" refers that not all subcomponents are presented in the table, thereby the grand total might not add up. For instance, contingency reserves are not presented in this chapter.

10/ Data reflects budget figures in light of Decree Number 85 for the year 2022.

* Preliminary, subject to revision.

1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

3/ SIF deposits were previously included in General Government deposits, see Table (16).

4/ Data revised to exclude deposits used as loan facilities for budget sector starting June 2006.

* Preliminary.

1/ Gross External Government debt has witnessed an increase during last year by US\$ 23.3 billion mainly in light of the borrowing from Eurobond issuances of 7 billions, 2.75 billions loan by the IMF (part of extended fund facility), 2 billions loan by the WorldBank and 0.5 billion loan by the African Development Bank.

2/

It's noteworthy that during 2017 a total amount of US\$ 30 billion was repaid, as per Central Bank of Egypt, distributed on due bonds, foreign debt of international banks such as African Export-Import Bank, deposits and loans from many countries of which KSA, Libya and Turkey, in addition to obligations to government entities such as EGPC and other obligations to Paris Club.

3/

Based on CBE classification. CBE writes-off outstanding debt on government entities (both direct and indirect) to Paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts (dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

4/ CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

5/

Gross External debt/GDP and Government external debt/GDP are as reported by Central Bank of Egypt and non-government debt/GDP is residual.

6/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

7/ Worth mentioning that gross external debt at end of quarter is calculated as a ratio of full-year exports of goods and services.
