Executive Summary

Latest Economic Developments

In late June 2022, Egypt's Parliament approved the FY 2022/23 state's general budget, which was officially enacted on July 1st, 2022. It is noteworthy that the current year's budget has been prepared in an exceptional context where the repercussions of the COVID-19 pandemic intertwined with the Russia-Ukraine crisis' spillovers. Nevertheless, the FY 2022/23 budget reflected the continued commitment of the Government of Egypt (GoE) to advance reforms at the institutional, administrative and structural levels in accordance with international best practices, including speeding up mechanization and digital transformation. In this regard, it is worth noting that the Ministry of Finance has exerted significant efforts to optimize the use of modern technology in all transactions in line with the government strategy of the transition to "digital Egypt". Examples of the most notable implemented digital projects by MOF are as follows;

- **The Government Financial Information Management System "GFMIS",** has linked all spending transactions into a single treasury account "TSA", and has helped in achieving efficient spending control.
- **The automation of tax and customs systems,** has contributed to raising the efficiency of tax collections and reducing evasion.
- **Developing the "Government Electronic Signature Mechanism",** has made Egypt one of the first countries in Africa and the Middle East to adopt the "electronic invoices" and "electronic receipts", while enabling the follow-up of commercial transactions between companies in a digital format.
- **The implementation of "electronic budget"** has led to improving the efficiency of public financial management, and helped in mitigating fiscal risks more efficiently and on a timely manner in the face of global and domestic crisis.
- **The implementation of ACI system,** via linking Egypt ports into a unified electronic platform "Nafeza", has led to the establishment of logistic centers for customs services, while facilitating the movement of internal and external trade, and has helped to reduce average customs release time by 50% according to a recent study by the world bank.

On the other hand, in an effort to facilitate free flow of trade and enhance investments, customs tariff was recently reduced on more than 150 types of production requirements and inputs, according to the presidential decree Number 218 for the year 2022. A move to meet the international requirement of 2022 Harmonized System issued by the World Customs Organization. The amendments included 351 commodity groups, including 77 in the agricultural and food sector, 58 in the chemicals sector, 38 in the wood industry, 21 in the textile sector, 27 in the metals sector, 52 in the machinery and equipment sector, and 22 in the transportation field, as well as 65 amendments to all other sectors. This important amendment would help improve Egypt's appetite to achieving more flow of trade, and openness to the international trade.

In addition, it is worth mentioning that in late June, the International Monetary Fund (IMF) issued the Ex-Post Evaluation (EPE) of Egypt's Exceptional Access Under the 2020 Stand-By Arrangement (SBE), which assessed the IMF's financial support to Egypt amid the COVID-19 outbreak. In this context, it is noteworthy that the IMF Executive Board affirmed that the 12-months program achieved its primary goal of maintaining macroeconomic stability in Egypt in the wake of the disruptions caused by the pandemic.

1/ Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due to Central Administration, Local Governments, and Public Service Authorities.

3/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

4/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

5/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

6/ Total Government Debt includes External Debt serviced by the Ministry of Finance.

7/ Quarterly debt service data represent cumulative flows from beginning of fiscal year.

8/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

9/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

1/ Starting September 2019, CPI Urban data is based on the weights derived from 2017/2018 income and expenditure survey, and using 2018/2019 as a base. Prior to this date, the basket and weights were derived from 2007/2008 income and expenditure survey taking January 2010 as a base month.

2/ The new series of Producer Price Index was issued by CAPMAS starting September 2007, using 2004/2005 prices of goods and services as a base period, and deriving sub-group weights from average values of agricultural, industrial and services production for the years 2002/2003 and 2003/2004. It is worth mentioning that Producer Price Index series before September 2007 are not available so far.

3/The Central Bank of Egypt launched "Core Inflation Index" derived from the CAPMAS headline CPI, however it excludes items characterized by inherent price volatility and those with managed prices, specifically 'fruits and vegetables' (8.8 percent of headline CPI basket) as well as 'regulated items' (19.4 percent of headline CPI basket).

-- Data are preliminary & under preparation until being finalized.

1/ Data reflects budget figures in light of Decree Number 85 for the year 2020.

2/ The decline in Taxes on Corporate Profits from CBE is mainly due to the accommodative monetary policy adopted by the CBE to curb inflation since FY16/17, where the increase in interest rates has imposed burdens on CBE profits, as it is expected that no tax receipts would be collected from CBE till end of FY19/20.

3/ The noticeable increase in Tax on T-bills and bonds' payable interest is mainly due to the adoption of new law number 3 for the year 2021, which included the removal of tax exemptions implied to T-bills and bonds' payable interest in March 2021.

4/ Data reflects budget figures in light of Decree Number 74 for the year 2021.

* Preliminary-Actual.

* Data reflects budget figures in light of Presidential Decree Number 8 for the year 2016.

* **It is noteworthy that preliminary fiscal data for the year 2014/2015 is still under preparation and will be published when finalized.**

-- Data are preliminary & under preparation until being finalized.

1/ Data reflects budget figures in light of Decree Number 85 for the year 2020.

2/ Reflects Treasury contributions towards Pension Funds.

3/ Includes expenditures on defense.

4/ The increase in "Direct investment (including customs fees)" represents expected increases in self finances for the social housing program. This increase has similarly corresponding increases on the revenues side.

5/ The decline in subsidies from EGPC is mainly in light of the decline in international petroleum prices.

6/ The increase in spending on Direct investment (including customs fees) is mainly due to the increase in infrastructure spending, more specifically spending on roads, transportation, buildings, hospitals and schools. To that extent, total spending on construction amounted to LE 29.2 billion during FY15/16, increasing by 44 percent compared to the previous year, and spending on Non-residential buildings amounted to LE 10 billion, increasing by 17.7 percent compared to the previous year.

7/ The increase in Service expenditures for non employees reflects the increase in spending on health treatments financed by state budget.

8/ The notable increase in subsidies to EGPC is mainly due to the Exchange rate depreciation effects which has increased EGPC cost burdens substituted through increasing the allocated subsidies to EGPC.

9/ It is noteworthy that "of which" refers that not all subcomponents are presented in the table, thereby the grand total might not add up. For instance, contingency reserves are not presented in this chapter.

10/ Data reflects budget figures in light of Decree Number 74 for the year 2021.

11/ The increase in Social assistance benefits is due to the increase in "Contributions in Pension Funds", in light of the settlements between the treasury and pension fund.

* Preliminary, subject to revision.

1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

* Preliminary, subject to revision.

1/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB.

2/ This represents part of the Economic Authorities' deposits at TSA that is borrowed by the Budget sector in the form of loan facilities. Hence it represents an interrelated debt between the Budget and Economic Authorities and is therefore deducted on consolidation from both gross Public Sector debt and deposits of Economic Authorities.

3/ SIF deposits were previously included in General Government deposits, see Table (16).

4/ Data revised to exclude deposits used as loan facilities for budget sector starting June 2006.

5/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

* Preliminary.

1/ Gross External Government debt has witnessed an increase during last year by US\$ 23.3 billion mainly in light of the borrowing from Eurobond issuances of 7 billions, 2.75 billions loan by the IMF (part of extended fund facility), 2 billions loan by the WorldBank and 0.5 billion loan by the African Development Bank.

2/

It's noteworthy that during 2017 a total amount of US\$ 30 billion was repaid, as per Central Bank of Egypt, distributed on due bonds, foreign debt of international banks such as African Export-Import Bank, deposits and loans from many countries of which KSA, Libya and Turkey, in addition to obligations to government entities such as EGPC and other obligations to Paris Club.

3/

Based on CBE classification. CBE writes-off outstanding debt on government entities (both direct and indirect) to Paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts (dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

4/

CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

5/

GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE 5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

6/

Gross external debt as % of GDP is calculated using end of period exchange rate.

7/

There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

8/

Worth mentioning that gross external debt at end of quarter is calculated as a ratio of full-year exports of goods and services.

9/

Data reflects external loans that are serviced by MOF only until June 2007. Starting June 2008, data includes the blocked account, which incorporates debt repayments by government entities according to the original schedule (which precedes rescheduled dates in light of Qarz Club Agreement).

10/

At end of June 2008, the CBE and Ministry of Finance agreed to use part of the blocked account balance to retire part of the bonds outstanding on government to CBE, and in return the Ministry of Finance is obligated to service Qarz Club debt on due dates to creditors. Thus external debt serviced by the Ministry of Finance has significantly increased at end of June 2008. Meanwhile, CBE revised its classification of Government external debt only in Sep'08, which explains the increase in Debt Serviced by MOF over government debt reported by CBE on Jun'08.

* Preliminary

1/ The increase witnessed in the total government debt service comes in light of the rise in the principal payments of the domestic debt due to the increase in treasury bond repayments by almost LE 100 billion by the end of FY14/15.

2/ GDP actuals for FY18 /19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.
