1/ Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due to Central Administration, Local Governments, and Public Service Authorities.

3/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

4/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

5/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

6/ Total Government Debt includes External Debt serviced by the Ministry of Finance.

7/ Quarterly debt service data represent cumulative flows from beginning of fiscal year.

8/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

9/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

I/ Starting September 2019, CPI Urban data is based on the weights derived from 2017/2018 income and expenditure survey, and using 2018/2019 as a base. Prior to this date, the basket and weights were derived from 2007/2008 income and expenditure survey taking January 2010 as a base month.

2/ The new series of Producer Price Index was issued by CAPMAS starting September 2007, using 2004/2005 prices of goods and services as a base period, and deriving sub-group weights from average values of agricultural, industrial and services production for the years 2002/2003 and 2003/2004. It is worth mentioning that Producer Price Index series before September 2007 are not available so far.

3/The Central Bank of Egypt launched "Core Inflation Index" derived from the CAPMAS headline CPI, however it excludes items characterized by inherent price volatility and those with managed prices, specifically 'fruits and vegetables' (8.8 percent of headline CPI basket) as well as 'regulated items' (19.4 percent of headline CPI basket)

-- Data are preliminary & under preparation until being finalized.

1/ Data reflects budget figures in light of Decree Number 85 for the year 2020.

2/ The decline in Taxes on Corporate Profits from CBE is mainly due to the accommodative monetary policy adopted by the CBE to curb inflation since FY16/17, where the increase in interest rates has imposed burdens on CBE profits, as it is expected that no tax receipts would be collected from CBE till end of FY19/20.

3/ Revenues from special accounts and funds belonging to budget sector entities like public universities, medical centers and research institutions. Such revenues are met by equivalent amounts on the expenditures side.

4/ Includes additional 10 percent of the monthly receipts of the Special Accounts and Funds, in addition to 25 percent of the outstanding balances of those funds were transferred to the Ministry of Finance applied only during 2013/2014 according to law Number 19 for the year 2013.

6/ The increase in "Other capital revenue to finance investments" represents expected increases in self finances for the social housing program. This increase has similarly corresponding increases on the expenditure side.

7/ The decline in dividends from EGPC is mainly in light of the decline in international petroleum prices.

8/ The decline in dividends receipts from Suez canal is partially due to the slowdown in international trade, and China slowed economic growth. In addition, the decline in international oil prices have affected the number of vessels passing through Suez Canal.

9/ The increase in receipts from Miscellaneous revenues is mainly due to the acquisition of 25 percent of the delayed profits with a total amount of LE 1.5 billion, and the increase in resettlements revenues from Lands by LE 4 billion, in addition to the repayment of other tax dues by LE 3.5 billion during the year of study.

10/ The decline in Dividends collected from EGPC is due to the increase in cost burdens on EGPC due to the effect of depreciated Egyptian Pound Exchange rate against US Dollars.

11/ The decline in Dividends collected from CBE is mainly due to the accommodative monetary policy adopted by the CBE to curb inflation since FY16/17, where the increase in interest rates has imposed burdens on CBE profits.

12/ The increase in Other Property Income is due to the additional LE 6.6 billion from the sale of 4G license.

13/ The increase in grants is mainly due to Capital Grants received from United Arab Emirates (UAE) to finance investments during FY16/20.

14/ Reflects the indirect cost effect of economic reform program, as it is expected that no dividends would be collected from CBE till end of FY19/20.

15/ The increase in current miscellaneous revenues represents mainly increased receipts related to previous year revenues, and other current revenues.

16/ The increase in capital revenues represent increased receipts from miscellaneous capital revenues related to acquisitions in public authorities. In addition to increased proceeds from sale of non-productive assets (Lands).

-- Data are preliminary & under preparation until being finalized.

1/ Data reflects budget figures in light of Decree Number 85 for the year 2020.

2/ Reflects Treasury contributions towards Pension Funds.

3/ Includes expenditures on defense.

4/ The increase in "Direct investment (including customs fees)" represents expected increases in self finances for the social housing program. This increase has similarly corresponding increases on the revenues side.

5/ The decline in subsidies from EGPC is mainly in light of the decline in international petroleum prices.

6/ The increase in spending on Direct investment (including customs fees) is mainly due to the increase in infrastructure spending, more specifically spending on roads, transportation, buildings, hospitals and schools. To that extent, total spending on construction amounted to LE 29.2 billion during FY15/16, increasing by 44 percent compared to the previous year, and spending on Non-residential buildings amounted to LE 10 billion, increasing by 17.7 percent compared to the previous year.

7/ The increase in Service expenditures for non employees reflects the increase in spending on health treatments financed by state budget.

8/ The notable increase in subsidies to EGPC is mainly due to the Exchange rate depreciation effects which has increased EGPC cost burdens substituted through increasing the allocated subsidies to EGPC.

9/ The increase in social assistance benefits is in light of the increase in treasury contributions in Pension funds with the implementation of the new pension law number 148 for the year 2019.

10/ The increase in fixed assets direct investments represents mainly increased spendings in construction, machinery and equipments, and nonresidential building and dwellings in light of the government strategy to increase investments allocated to improve infrastructure, and it includes payments to contractors.

11/ The increase in spendings of non-productive assets represents increased investments spending to purchase lands.

12/ The increase in previous year interest includes interest payments on T-bills on the treasury contribution in pension funds. This accounting methodolg has been modified for the current fiscal year to be replaced by the treasury providing direct payments to the Pension funds with the implementation of the new pension law number 148 for the year 2019.

13/ It is noteworthy that "of which" refers that not all subcomponents are presented in the table, thereby the grand total might not add up. For instance, contingency reserves are not presented in this chapter.

1/ Domestic debt figures were revised in consistency with international standards of classification. Debt figures depict consolidated stocks at three different levels of compilation; the Budget Sector, the General Government, and the Public Sector. The Budget sector debt stock encompasses outstanding stocks of Central Administration, Local Governments, and Public Service Authorities. The General Government debt stock includes the consolidated debt stocks of the Budget sector, the NIB, and SIF. The Public sector debt stock corresponds to the consolidated debt of the General Government and Economic Authorities.

2/ Outstanding domestic debt stocks due on Central Administration, Local Governments, and Public Service Authorities.

3/ The notable decline in Budget sector deposits can be explained in light of the use of nearly LE 60 billion according to the presidential decree number 105 for the year 2013.

4/ Consolidated domestic debt of the Budget sector, NIB, and SIF. This level of compilation entails the deduction of Budget Sector borrowings from NIB, MOF securities held by the SIF and NIB, the SIF bonds, and NIB borrowings from SIF.

5/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB as well as Budget Sector borrowing from Economic Authorities.

6/ Total deposits of General Government and Economic Authorities (net of SIF deposits and Budget Sector borrowing from Economic Authorities).

7/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

* Preliminary, subject to revision.

1/ Consolidated domestic debt due on the General Government and Economic Authorities. This level of compilation excludes outstanding debt of Economic Authorities to NIB.

2/ This represents part of the Economic Authorities' deposits at TSA that is borrowed by the Budget sector in the form of loan facilities. Hence it represents an interrelated debt between the Budget and Economic Authorities and is therefore deducted on consolidation from both gross Public Sector debt and deposits of Economic Authorities.

3/ SIF deposits were previously included in General Government deposits, see Table (16).

4/ Data revised to exclude deposits used as loan facilities for budget sector starting June 2006.

5/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

* Preliminary.

1/ Gross External Government debt has witnessed an increase during last year by US\$ 23.3 billion mainly in light of the borrowing from Eurobond issuances of 7 billions, 2.75 billions loan by the IMF (part of extended fund facility), 2 billions loan by the WorldBank and 0.5 billion loan by the African Development Bank.

2/ It's noteworthy that during 2017 a total amount of US\$ 30 billion was repaid, as per Central Bank of Egypt, distributed on due bonds, foreign debt of international banks such as African Export-Import Bank, deposits and loans from many countries of which KSA, Libya and Turkey, in addition to obligations to government entities such as EGPC and other obligations to Paris Club.

3/ Based on CBE classification. CBE writes-off outstanding debt on government entities (both direct and indirect) to Paris Club according to rescheduled dates of repayments. On the other hand, indebted government entities write-off these debts (dominated in EGP) once they are paid back to CBE and according to original schedule, which precedes rescheduled dates.

4/ CBE reclassified US\$ 4.3 billion as part of Central and Local Government debt, that was only reflected in its statistics starting September 2008. It is noteworthy that such reclassification has not had any impact on the total outstanding foreign debt.

5/ GDP actuals for FY18/19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE 5960.9 billion according to the data published by the Ministry of Planning and Economic Development.

6/ Gross external debt as % of GDP is calculated using end of period exchange rate.

7/ There is a combined factor behind the stabilization of gross external debt as percent of GDP at end of June 2020 compared to end of June 2019: on one hand, the increase in nominal value of GDP in FY19/20; in addition to the appreciation in exchange rate.

8/ Worth mentioning that gross external debt at end of quarter is calculated as a ratio of full-year exports of goods and services.

* Preliminary

1/ The increase witnessed in the total government debt service comes in light of the rise in the principal payments of the domestic debt due to the increase in treasury bond repayments by almost LE 100 billion by the end of FY14/15.

2/ GDP actuals for FY18 /19 has been revised to reach LE 5322.3 billion instead of LE 5250.9 billion. Meanwhile GDP for FY19/20 was revised to reach LE 5820 billion instead of LE5960.9 billion according to the data published by the Ministry of Planning and Economic Development.
